

Book Store Website - Client Documentation

Introduction

Welcome to the Book Store Website! This project is designed to showcase a collection of books in an easy-to-navigate online store. It is a live website where users can view and browse books, and administrators can manage the book details quickly and easily.

Project Overview

- **Live Website:**
The website is accessible online at <https://book-store-guuf.onrender.com>. This means anyone can visit and view the collection of books.
- **Two Main Areas:**
 - **User Side:**
Visitors can browse the books, which are grouped into two categories:
 - **Best Seller:** Books marked as popular by the admin.
 - **New:** Recently added books.
 - **Admin Side:**
An administrator can log in to a secure panel to manage the books. This includes:
 - Adding new books.
 - Editing book details.
 - Deleting books. The admin panel uses a simple table format for managing these tasks.

Key Features

- **Easy Browsing:**
Users can easily see a list of books along with their details like name, price, author, and description.
- **Book Categories:**
Books are clearly divided into **Best Seller** and **New**, making it simple for customers to find popular or recent additions.
- **Simple Admin Management:**
Admins have a straightforward login system. Once logged in, they can use a form to add new books or a table view to edit and delete books.

How to Use the Website

For Visitors (Users):

1. **Access the Website:**
Open your web browser and visit <https://book-store-guuf.onrender.com>.

2. **Browse Books:**

You will see a list of books displayed in two sections:

- **Best Seller** (popular books)
- **New** (recently added books)

3. **Select a Book:**

Click on any book to see more details (if such functionality is provided).

For Administrators:

1. **Admin Login:**

Admins have a dedicated login page where they enter their email and password. (These credentials are pre-set in the system.)

2. **Manage Books:**

- **Add a Book:** Use the provided form to enter details like Book Name, Price, Author, Description, and check the Best Seller box if applicable.
- **Edit/Delete a Book:** After logging in, a table lists all the books. Next to each book are options to edit the details or delete the book from the list.

Benefits for Clients

- **User-Friendly Experience:**

The website is designed to be easy for anyone to use, whether you are browsing or managing the books.

- **Live and Interactive:**

The website is fully operational online, ensuring that customers can always access the latest book listings.

- **Straightforward Management:**

The admin interface is simple, which means managing the book inventory is quick and does not require any technical expertise.

Conclusion

This Book Store Website is a live, fully-functional project that makes it easy for customers to browse books and for admins to manage them. With clear categorization and a simple management interface, the project is designed to offer an excellent user experience for both visitors and administrators.
